

## Errata to “On the ‘bridge hill’ of the violin”

A factor  $m$  is omitted from the last term in the denominator of equation (1): it should read

$$Y_b(\omega) = \frac{kY_v + i\omega}{k - m\omega^2 + i\omega kmY_v} \quad (1)$$

On page 157 immediately above equation (3) the word “base” should be omitted from the sentence, to read:

“Assuming that the mass of the bridge is small enough to be neglected, it is easy to show that”
